

Will you live
comfortably
through your
remodel?

BREATHE EASY.

Your contractor has a dust management plan in place.

Welcome to an integral part of dust management.

LESS MESS. MORE LIVING.

A great remodel is all in the details.
And a BuildClean™ contractor knows that.

While your home is under construction, there's so much on your mind—especially the beautiful end result. But getting there can be tough, because kicking up dust is part of the remodeling process.

Managing that dust to maintain air quality is quickly becoming an industry standard, in order to keep your living space cleaner...and livable. And with BuildClean's innovative dust control system as part of our overall dust management plan, we're ahead of the game. This lightweight, small machine quietly traps, contains and eliminates up to 90% of airborne dust to keep things comfortable for you and your family.

EPA:
indoor air
is **5X** dirtier
(And during a
remodel, it's
worse.)

THERE'S MORE TO IT THAN JUST DUST.

Your BuildClean contractor always has your comfort in mind.

BuildClean's unique 360° design and dual HEPA air filtration collects dust from every direction and:

- Keeps dust from settling where it shouldn't—and from lingering in your home long after the work is complete
- Provides healthier conditions for family and pets
- Safeguards against particles and irritants like crystalline silica and lead
- Protects sensitive electronics like computers and TVs

YES, YOU WILL LIVE COMFORTABLY THROUGH YOUR REMODEL WITH US—BECAUSE WE BUILDCLEAN.
